---

## QuickBooks Windows

### Web Connect

#### Introduction

As Texas Brand Bank completes its system conversion to new online banking, you will need to modify your QuickBooks settings to ensure the smooth transition of your data. Please reference the dates next to each task as this information is time sensitive. To complete these instructions, you will need your User ID and Password for the Texas Brand Bank website.

It is important that you perform the following instructions exactly as described and in the order presented. If you do not, your service may stop functioning properly. This conversion should take 15–30 minutes.

## Documentation and Procedures

### Conversion Preparation

**NOTE:** If multiple computers do not use the same QuickBooks data file, skip step 3. QuickBooks activities such as **Online Banking** cannot be performed in multi-user mode because of the way the activities interact with a company data file.

3. Switch to single user mode. For instructions to switch to single user mode, choose **Help** menu > **QuickBooks Help**. Search for **Switch to Single User Mode** and follow the instructions.

**NOTE:** If you are not using Classic Mode (Register Mode), enable it for the conversion. You can change it back after the conversion is complete.

4. Enable Classic Mode (Register Mode).
